

# Masimo SafetyNet™ Smartphone Rental Program

A Convenient Solution to Support the Deployment of Masimo SafetyNet

## Program Overview

The Masimo Smartphone rental program supports the deployment of the Masimo SafetyNet remote patient management system by extending smartphone access to patients who are unable to use their own.

Each smartphone is single-patient use and provided for a standard rental period of three months. If necessary, the rental period can be extended. The smartphone is ready to use out of the box:

- > Pre-installed Masimo SafetyNet app
- > Built-in data plan for internet connectivity
- > Security features to prevent user error and tampering

## Extend Masimo SafetyNet to More Patient Populations

The Masimo SafetyNet smartphone program helps ensure more patient populations can benefit from remote monitoring, including those who:

- > Do not own a smartphone
- > Are unable to install Masimo SafetyNet on their personal smartphone
- > Do not have access to the internet

## Rental Process & Procedure

The Masimo SafetyNet smartphone rental program is easy to implement for both large and small health systems.

### Deliver

After an order is placed, Masimo delivers the smartphones to the hospital. Once received, the initial three-month rental period begins.

### Discharge

The hospital provides the patient with the Masimo SafetyNet Kit and smartphone upon discharge.

### Return

Upon completion of monitoring, the patient returns the phone to Masimo using the prepaid return label included in the box.
